Education

University of Engineering and Technology, Lahore

Bachelor of Science in Computer Engineering CGPA: 3.12/4.00

The KIMS College, Chiniot

ICS Marks: 1085/1100

Nov. 2021 – May 2025

Lahore, Punjab, Pakistan

Aug. 2019 – July. 2021

Chiniot, Punjab, Pakistan

Experience

AI Engineer Intern

Dec 2025 – Present

AI4LYF

Remote

- Developing and optimizing machine learning, deep learning, and NLP models for analyzing multi-modal health data.
- Working with LLMs and Agentic AI frameworks to build intelligent systems for healthcare insights and decision support.
- Designing data pipelines for preprocessing and managing large-scale environmental, behavioral, and textual datasets.
- Collaborating with global AI experts to explore prompt engineering, LLM fine-tuning, and retrieval-augmented generation (RAG).

Artificial Intelligence

June 2024 – August 2024

Generative AI Intern

Xavor Corporation, Lahore, Pakistan

- Implemented NLP preprocessing (stop-word removal, stemming, lemmatization) to improve text data quality and downstream ML model performance.
- Developed and evaluated feature extraction methods (BoW, TF-IDF, n-grams) and word embeddings (Word2Vec, GloVe) for semantic representation in NLP tasks.
- Built Retrieval-Augmented Generation (RAG) pipelines using Pinecone, ChromaDB, Hugging Face, and OpenAI embeddings to enhance contextual response accuracy.
- Fine-tuned LLMs (Llama 2, Gemma) using LoRA/QLoRA and deployed UIs with Streamlit.

Final Year Project

Smart Fire Extinguisher System | Machine Learning, Computer Vision

June 2024 – May 2025

- Developed a CV-based system using deep learning for early fire detection with a smart camera sensor.
- Implemented real-time smoke and fire recognition leveraging YOLO-based object detection and image processing.
- Integrated an automated fire suppression with a motor pump system that dynamically adjusts water spray trajectory.
- Designed a fire monitoring module that maps locations using coordinate-based calculations for precise response.

Projects

AI Language Detector and Translator | Python, AI

Nov 2023

- Developed an AI-based system that automatically detects the language of input text and translates it into a target language.

Real-Time Air Quality Monitoring System | Embedded, IoT

December 2023

- Designed an Arduino-based IoT system that monitors air pollution levels using sensors and sends real-time environmental data to a cloud platform..

JARVIS Assistant | Python, AI, Voice Recognition

Feb 2022

- Built a voice-controlled virtual assistant using Python and Tkinter that performs tasks like web search, email sending, and information retrieval.

Technical Skills

AI/ML: TensorFlow, PyTorch, Scikit-learn, OpenCV, Hugging Face, LangChain, Pinecone, ChromaDB

Languages: Python, Java, C++, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, PyCharm, IntelliJ, Visual Studio, SQL Server, Git, Streamlit, Jupyter, Raspberry Pi

Certifications

Artificial Intelligence and Machine Learning

Sep 2025 – Nov 2025

NAVTTTC - Prime Minister Youth Skill Development Program

ShellShift, Lahore

Generative AI Bootcamp Internship

August 2024

Xavor Corporation

Lahore, Pakistan

Artificial Intelligence and Machine Learning

August 2024

ACM Fellowship Program 2024

Online

Introduction to Web Development with HTML, CSS, JavaScript

June 2024

Coursera - Authorized by IBM

Online

Introduction to Relational Databases (RDBMS)

January 2024

Coursera - Authorized by IBM

Online
